

UNIVERSITY of the
WESTERN CAPE

BlueConnect Benthic Ecology Field Course

Join an exciting 10-day field course on subtidal ecology!
March 16th to 26th, 2019. Cape Town, South Africa.

The course is open to graduate and postgraduate students from South Africa and Norway. It will be an integrative experience combining subtidal field work along the coast of South Africa, practical data handling, research training and lectures. The course covers a wide range of topics, including marine ecology, kelp forests, experimental design, scientific data collection and analysis, and use of remotely sensed data. Flights, equipment and housing expenses are covered.

Interested students should apply by January 31, 2020 at
www.BlueConnectProject.com
